

Pioche Weekly Record

THURSDAY, MAY 11, 1893.

POSTOFFICE HOURS.

8 A. M. to 7 P. M.
SUNDAYS,
6 P. M. to 7 P. M.

No money orders issued or letters registered after 6:30 P. M. and none on Sundays.

JOHN SHIER, P. M.

LOCAL INTELLIGENCE.

Subscribe for the RECORD.

Jim Lanter was in from Cave Valley yesterday.

A. A. Carrion was in town yesterday from Helene.

Wild flowers are abundant on the hillsides about town.

Henry Eller returned this morning from a visit to Salt Lake.

Thomas Cockburn was a passenger on Tuesday's stage for Salt Lake.

Geo. W. Blanchard is driving the Taylor stage and makes good time.

The finest bar liquors in the country are dispensed over the Palace bar.

Prof. Foster predicts that a cool wave will cross the western mountains to-day.

Pat Conley has secured a chloride lease on the first level of the old Mazepa mine.

A few days more of mild weather and fly screens and doors will need to be put in place.

C. P. Ronnow, Chas. Mathews, Sr., and his son, were visitors from Panaca yesterday.

For neat, new and stylish patterns in all lines of summer goods, go to the Mercantile Co.'s store.

Mining Location Notices for sale at this office.

Dick Gordon and family will hereafter run the Eisenmann ranch in Pahranaagat Valley. They moved their effects there last week.

A dozen or more Piochers, all glad to meet each other, were at the Salt Lake depot to meet W. J. Dooley on his arrival there last week.

Mark Churich has a car of ore in course of shipment from the Mendha mine to Salt Lake. It is heavy in lead and also runs up well in silver.

The house of S. E. Wertheimer has secured the exclusive handling for this section, of the celebrated McBryer whisky.

Mrs. Julia McFadden left for Salt Lake by Tuesday's stage to attend to the administration of a portion of her recently deceased husband's estate there.

Gent's and boys' clothing, etc., and general furnishings, at the Mercantile Co.'s store. New goods for summer wear just in. Call and examine.

Toney Jacobson has quit work on the west end of the Meadow Valley ground, where he has been chloriding for several months past. A shipment of ore was made from there last Sunday.

C. E. Goodrich was an outgoing passenger on Tuesday's stage, bound for Washington, D. C., on business connected with the window-shade roller on which he has applied for patent. He will make a World's Fair trip of it, also, before returning.

Eisenmann is selling a complete riding outfit of saddle, cinch and bridle at the extremely low price of \$15. These are army saddles of the McClelland style and are well made and durable, and the easiest, when in use, on both man and beast.

County Assessor Freudenthal received his new road buggy Monday, and left to-day for the southern part of the county on his principal assessing trip. The new vehicle is said to be peculiarly suited to the dry mountainous country hereabouts.

Already a material part of our population has journeyed out toward the great Fair, and many more talk of going shortly. The question arises, shall we let them all go at once, or insist on enough remaining to keep guard over the town?

The Godbe Mercantile Co. has received a part of its consignment of summer goods. They embrace a full line of English flannellets, gingham, lawn, calico, etc., etc., all of the best makes and latest patterns, many of them particularly neat and tasty. Prices on everything are put down low and you are bound to find something to suit if you call.

The "Palace" is doing a rushing business now-a-days, notwithstanding the dullness of the times. This is easily accounted for, as the place is the headquarters of mining and stock men, two classes of our citizens whom hard times does not seem to affect. Another reason for the splendid business of the "Palace" is the fact that nothing but the finest grade of goods is kept in stock—no finer can be had anywhere.

Our Milford mail and stage route is the cause of much complaint recently. The schedule time from here to Milford is twenty-two hours, and this was observed for a long time, but recently the contractors have taken thirty-six hours for the service, through stopping over at Desert station at night, which also creates a night's delay at Milford, and a great deal of justly grounded complaint is the result. No effort is made to connect with the trains at Milford either way, and twenty-four hours time is lost in going north. The mail contract has not been altered and special service will be established on the line if necessary.

by the postmaster here, unless the difficulty is soon adjusted.

The mail trouble on the Milford route seems to be settled and stages now run through to Milford. This was begun two days ago.

Wm. Culverwell and Charley Lytle went to Helene yesterday on sawmill business.

Cattlemen hereabouts are preparing for a general delivery to Eastern buyers about the last of May.

The celebrated McBryer whisky is the finest in the world. Families supplied. S. E. Wertheimer has the sole handling of this famous whisky.

The Bristol postoffice being closed, the Taylor stage will hereafter go out via the Four Mile house, the old Hamilton road, leaving Royal City and Bristol to the west.

Several head of stock have died recently from drinking at the tailing pit below town. During the past week, A. F. Baron lost a cow, and Pete Lynch and Mrs. Carman each a calf from this cause.

R. W. Zachow, at his mill below town, has his concentrating tables running on full time. He completed the shipment of a carload of concentrates to Salt Lake and will shortly have another carload ready.

The snowfall in the Rocky Mountains along the line of the Canadian Pacific railway during the past winter was 39 feet, which is only 10 inches short of the unprecedented fall during the winter of 1887.

Yesterday witnessed the presence in town of more of our country residents than has occurred in a long time, except during a sitting of court. Panaca, and Spring, Eagle, Pahranaagat and Cave Valleys, and also the Wash, were represented.

Deputy Harrison in the County Recorder's office has been busy for some time past with mining locations and transfers from Yellow Pine district. His biggest item was two batches of location notices which occupy fifty-five pages of the location record book.

The general stagnation of business felt in town here, extends all over the county, and even the cattlemen shake their heads dubiously when asked what the future for us is to be, though they are presumed to be more independent of our chief industry than any other class.

Mrs. A. S. Thompson and family left for Chicago last Sunday, where they will spend the summer. Master Charley will probably remain permanently and attend school. Miss Henrietta Werner accompanied them as far as Salt Lake, where she will visit friends, extending her trip to Leadville, Colo., before returning here.

A weekly letter from a special correspondent of the RECORD at Chicago, on Fair matters, will appear regularly hereafter. Later on they will take especial note of Nevada's representation and of Lincoln County in particular, and will be illustrated with views of things of local interest.

The furniture of Samuel T. Godbe, contained in his residence on Meadow Valley street, is to be sold at public auction. This is a line of very fine furniture, nearly as good as new, and those looking for purchases of household effects cannot do better than attend the sale, as some bargains are bound to be secured. See ad. in another column.

This morning Geo. B. Warren, with a four-horse team and a load of passengers, pulled out for Good Springs and Vanderbilt. Tom Borealis, Tom Young, Piper, and Wedge the Chinaman and his "family," helped to make up the load. It will require eight or ten days to make the trip, which is likely to be a warm one. Vanderbilt, now reasonably near the line of the new railroad, is said to be much overdone, and several hundred idle men are reported thereabouts.

The Yuba Mine.

This mine, the only property of the Pioche Con. Co. on which much work is being prosecuted, continues to improve. All the work for the past six months has been confined to the 12th and 13th levels, where on the 13th west drifting has been continued in order to connect with the workings of the old Mazepa, lying on the same ledge to the west, distant some 1500 feet. East of the Yuba shaft development work has been carried on, which has opened up a fine body of shipping ore, averaging over 100 ozs. silver and 50 per cent lead to the ton, and which is entirely free from base metals.

It is from this body that regular shipments are now being made to Salt Lake. The latest development in the mine is on the 1225 level, where a cross-cut of 12 feet to the north, through quartzite, shows up a strong ledge with four feet of clean shipping lead ore which averages over 100 ozs. silver to the ton. This find is being developed and promises to become a big thing. It is particularly important from the fact that it is found in quartzite, while all the other ore deposits in that part of the mine are in porphyry. It remains to be seen now whether the new find is a spur from the Yuba ledge or whether it is a spur from the Burke ledge; if the latter, its possibilities as an ore producer are simply immense.

F. P. Swindler a few days since completed a survey of the west drift on the Yuba 12th, running towards the Mazepa, and the surface ground, which shows the drift to be still fifty feet short of tapping the Mazepa shaft, and when that distance is run it will be necessary to sink some twenty-five feet further. The work will be continued until the connection is made, as it is necessary for air in the Yuba lower workings and to preserve the timbering of the Yuba shaft.

YELLOW PINE DISTRICT.

An Interesting Batch of Items from Lincoln's Southern Camp—Slow Progress of the Railroad.

Correspondence of THE RECORD.

GOODE SPRINGS, Lincoln County, Nevada, April 20, 1893.

A. G. Campbell arrived here a few days ago with five work teams and a wagon load of miners from Minersville. He put two men to work on a copper claim three miles northwest of the Springs and let a contract to sink one hundred feet of a vertical shaft on the Mary Kirby mine and two men to sink a well on the dry lake midway between Goode Springs and Vanderbilt. He left for Vanderbilt himself yesterday morning.

George Arthur Rice, the Tintic banker, is in camp. He has bought Johnny Stotler's interest in a group of claims owned by him and Mr. Genser. Mr. Vermer says that he is about to buy Genser. The deed was made by Jno. H. McChrystal of Tintic, who has been here for some time. They intend to do a sampling business at The Needles in connection with their mining business.

The Keystone mine is working a small force of men and is looking well.

Good grade ore is being found in the sandrock country north of Goode Springs. The ore is of the same character as the Silver Reef ore, and assays well for copper.

Mr. Humphries of Colorado is doing work on some good claims in the district. Tommy Atkinson, an old-time Frisco man, has struck it rich over near Mesquite Springs. Tommy is a rustler and richly deserves success.

Mr. Thomas is working on his mine, the Rosa. It is looking well. Thomas has been here since '87 and ought to make a bushel of money.

Mr. Marsh has a well-sorted stock of goods, suitable to the trade, displayed for sale at Goode Springs. His business is growing daily. So is his little garden. Montgomery is about to start up and make a mill run. If the ore mills satisfactory to the party starting it up he will buy the property. It's a proposition that miners in search of employment should take with a grain of salt. For a while the road thither is long and dry. A man in this country without funds is like being far at sea in an open boat, rudderless.

Good ore has been struck on the north side of Big Devil mountain lately. Several locations have been made. Roberts, Robbins, McKnight and Josh Sweet are the lucky finders. The ore is of the same character as Campbell Mountain Top ore, and is of good grade. The ore is found high up on the scarp of the mountain. The earmarks usually found on permanent veins are, it is said, lacking. The ore occurs in bunches.

The latest railroad news is that it is still coming, but—at a snail's pace. The prospect for the railroad getting to Goode Springs this summer is growing less as the days go by. A couple of prospectors had the misfortune to have their blankets burnt one sunny day last week up in the Sandrock hills. That night the wind blew a hurricane and ice formed an inch thick. The wind is not always tempered to the shorn lamb, notwithstanding the saying of the good book.

Recent Real Estate Transfers of Record, etc.

Deed, W. H. Smith to J. V. Keeley, dated March 24, 1893; consideration \$5.00. Conveys 375 feet in the Marceau Clementina claim, Yellow Pine district. Deed, A. E. Buys to C. A. Bidwell, dated Sept. 30, 1893; consideration \$1.00. Conveys undivided one-half interest in the Shenandoah, Yellow Pine Mining district.

Deed, Jno. Baxter to C. E. Holt, dated March 9, 1893; consideration \$1.00. Conveys undivided half of the Snowstorm claim, Tom Piate Mining district.

Deed, Geo. Vronberg, C. Landstrom and Wm. J. Richmond to Isaac E. Blake, dated January 24, 1893; consideration \$10,000. Conveys the Gold Bug, the Golden Rule and the Bonanza claims, all situate in the El Dorado Mining district.

Deed, A. W. Stoddard to W. J. Kennedy, dated March 7, 1893; consideration \$10. Conveys a one-eighth interest in the Keeley lode, Yellow Pine Mining district; also a one-ninth interest in the Utah lode, same district.

Deed, Samuel Boda to H. Reischke, dated April 4, 1893; consideration \$25. Conveys a half interest in the Magna Charta and the Mayflower claims, Ferguson Mining district.

Deed, George W. Rose and W. H. Smith to J. V. Keeley, dated January 25th, 1892; consideration \$1. Conveys 750 feet in the Marceau Clementina claim, Yellow Pine district.

Deed, J. V. Keeley to August Werner, dated April 24th, 1893; consideration \$5000. Conveys a one-eighth interest in the Marceau Clementina claim, Yellow Pine district.

Deed, W. H. Smith to C. O. Perry, dated March 15th, 1893; consideration \$2000. Conveys one-sixth of 250 feet in the Yellow Jacket claim, Yellow Pine district.

Deed, J. V. Keeley to Samuel T. Godbe, dated April 24th, 1893; consideration \$5000. Conveys a one-eighth interest in the Marceau Clementina lode claim, Yellow Pine district.

Miss Martin, editor of the Carson News, says woman is a special dispensation of Providence to prevent a man's conceit from running away with him. She also says in her paper that when a man snores, three vigorous taps on the wall will quiet him without fail. She does not state how many taps is required to make a woman quit snoring.

MINING NOTES.

A gold brick worth \$230,000 will be exhibited by Montana at the World's Fair.

A number of Belmonters will soon depart for the gold fields in southeastern Nevada.

The Central Nevada says Mill city is very lively at present in consequence of the mining activity in the Central district, eight miles from the station.

A rich strike is reported in the War Eagle mine, Hawthorne district, owned by Kimball and Wardell. It is gold ore and estimated as high as \$50,000 to a ton.

The leaching plant put up by John Chiatovich & Co., at Silver Peak, for the treatment of gold tailings by the cyanide process, is a success.—Hawthorne Bulletin.

The Grand Junction Star says that the dollar rate from Denver to that place is being taken advantage of by many prospectors who are going into the Henry Mountains.

O. A. Brooks returned from Pine Nut last Wednesday. He reports that the Raycraft Bros. have struck a bonanza and are taking out daily a large amount of gold.—Dayton Times.

At Albuquerque, New Mexico, logs have been unearthed which contain sixty per cent copper, and thirty to forty ounces of silver to the ton. The logs seem to have been imbedded in a solution containing copper and silver in past ages.

Hold on to your silver mines. The time will soon come when silver will be replaced in the front rank as a money metal. Many bankers are beginning to admit that rag money is not popular in times of financial panic.—Belmont Courier.

The hills surrounding Mason Valley are said to contain numerous ledges of gold, silver and copper, but no ledges, excepting the Garrard Ludwig copper mines, have been found of any value. Rich float rock can be found on all the hills, still no discoveries have been made.—Dayton Times.

The directors of the Calumet & Hecla copper mining company, at their recent meeting in Boston, declared a dividend of \$5 per share, payable May 13th. The amount of this dividend is \$500,000. As many as four dividends of this character have been paid during a single year. Stockholders have received \$38,500,000 in dividends.

It is said that wonderful discoveries in placers and quartz are being made in southern Oregon. Among the recent quartz discoveries was one by Green Bartlett, in the southern part of Josephine county. The find is on the copper belt a few miles south of Grant's Pass. An assay made in San Francisco showed twenty-three ounces gold, twenty-one ounces silver and ten per cent copper; total, nearly \$500 per ton.

The reported shipment of a car load of ore from the Keystone, that brought \$140,000, proves to have been a lot of 100 tons instead. The company is, however, preparing to make a shipment that will be an eye opener. The force at the mine will be materially increased about the first of the month, at which time the new hoist will be started.—Salt Lake Mining Journal.

The Silver Hill mine on the Cornstock employs two miners at \$4 per day each, says the Carson Appeal. It takes the following officers to run these two miners and manage the mine:

One superintendent per month, \$200.
One foreman per month, \$150.
One accountant per month, \$75.
One timekeeper per month, \$75.
One watchman per month, \$100.
One shift boss per day, \$5.
President, per month, \$150.
One secretary per month, \$150.

The above is simply published to show why some mines are always levying assessments.

For fine family liquors, call at the Palace.

George B. Warren left for Yellow Pine and Vanderbilt districts to-day. The reports from that section of our county continue favorable, and George will remain there permanently if matters are as good as recently represented.

A stock of merchandise will be placed in the Bullionville store shortly. The building is newly painted and ready for occupancy. It is expected that the store there will prove a general distributing point for that whole section of the county.

Charley Roe's copper furnace at Bristol, after running about a week, froze up last Monday night, but will be cleaned out and a new start made within a few days. About half the ore on hand was put through and the present shut down is attributed to poor charcoal, which from long exposure to the elements is said to have lost much of its gases. Thirteen tons of copper of extra good quality is the result so far, and this has been shipped to Salt Lake. Its arrival there will no doubt be of interest to those directly interested in the large copper plant about to be erected there.

COPPER RIVETED OVERALLS AND LEVI STRAUSS & CO. SPRING BOTTOM PANTS EVERY PAIR GUARANTEED.

About That Game of Base Ball.

[The following communication was received too late for last week's issue.]

PANACA, May 3, 1893.

EDITOR PIOCHE RECORD—Dear Sir:—There appeared in your paper last week an article in relation to the game of ball that was played between what was supposed to be the "Second Nine" of Pioche and the "Second Nine" of Panaca—I. e., "players not to be over twenty-one years of age." But when the Pioche nine arrived at the ball ground it was seen that out of the nine players six were over the prescribed age. Three of these were professional ball players, men that had traveled on their merits, and did nothing else but play ball, and that very poorly, I should judge, from the way they played here on the 24th of April.

The writer of that article above mentioned either had too much elegant booze in his system or else was very wrongfully informed concerning the Panaca nine. He stated that after seeing the players from Pioche the Panaca boys got three players over the prescribed age to take part in the game.

It is very true that three of our players were over age, but none of them pretend to be professionals; and furthermore they had been chosen before the Piochers came down, except one, and he was simply a substitute for a better player, who had been disabled the day before by a broncho horse.

In conclusion, I will state that the Pioche nine had been practicing every day after the challenge was accepted by our boys until the fatal day—to them.

The Panaca nine had been altogether once, and that was on the ball ground after the time appointed for the game to commence.

Chances are favorable that had we Mormons been in practice and were a faded suit of blue the score would have been 20 to 0 in favor of the Panacas.

Yours, etc., SHAK.

Bullionville.

W. S. Godbe was up from Bullionville yesterday. He reports the work of placing the new fifty ton leaching tanks to be progressing very satisfactorily and expects to have them in full operation before the present month closes. An additional firebox for the Howell roaster has been provided, which will improve the work of the furnace materially, and a cooling floor outside the mill, for the reception of roasted ores, etc., is also in course of construction. The result will be that fifty tons of ore and tailings per day will be handled without difficulty when the next start is made.

As Strange as Fiction.

The Virginia Chronicle says that Mrs. Jas. Morris, who died in Empire on the 29th ult., had a startling adventure in her early life. When fifteen years old she left Queenstown, Ireland, on board the Ocean Monarch. The steamer was out but a few hours when it took fire and 150 lives were lost before help arrived. Among the few saved was the late Mrs. Morris, who clung to the burning ropes with the hot tar running down her arms, and when rescued by the Prince de Joinville, who sighted the burning vessel from his pleasure yacht, which happened in the vicinity, she was perfectly helpless. She was taken back to Queenstown and the following year safely made the trip.

The recent discoveries of ore west of town have set several new parties to working on prospects in that direction, with promise in most instances of good returns for the expenditures made.

The editor of the Tarlock Times is of the opinion that the men of the United States ought to sit down upon hoop-skirts, whereupon the editor of the Mariposa Gazette, who is a lady, says she knows one hoopskirt that he will not sit down upon.

The Carson Appeal finds the following item in the Redlands Citigraph: "The Claremont Fruitgrower's Association today ships a carload of choice navel to England with a descriptive letter in each box. One box goes to Queen Victoria"—and remarks: We did not suppose the Queen was short of the article referred to. Probably the Citigraph refers to navel oranges.

Max Schaefer has leased the Perry & Martin saloon at Helene and to-day left for that place. He will personally conduct the business and all who go there will find his bar the best there. The probability that a force of men will be steadily employed at the Magnolia, justifies Max in making the move, as he says matters are a little too quiet in this immediate neighborhood at present.

St. Lager Beck, aged seventy-one years, died at the county hospital Wednesday morning of pneumonia. Mr. Beck has been freighting between here and White Hills for the past several months and very little is known about him. He came from Nevada and Utah originally and has claims against the government for depredations committed by Indians. He leaves an idiot son about thirty-five years of age. Utah and Nevada papers please copy.—Mohave Miner.

NEW TO-DAY.

AUCTION SALE

Elegant Furniture

BELOUGING TO S. T. GODBE

Saturday, May 20, '93

On the above date, at Pioche, will be sold the following elegant furniture:

- 1 fine Writing Desk,
- 1 fine Bed Lounge,
- 1 fine Sideboard,
- 2 fine Plush Carpets,
- 1 fine Cherry Table,
- 1 fine Bedroom Set,
- 3 Rocking Chairs,
- 3 Parlor Chairs,
- 1 Oak Book Case,
- 1 Oak Hall Tree,
- 1 Wardrobe,
- 2 Bedroom sets,
- 1 Cupboard or Closet,
- 1 Chiffonier,
- 6 Diningroom Chairs,
- 4 Kitchen Chairs,
- 1 Oak Bed generator,
- 3 Parlor Stoves,
- 1 Cooking Stove and Utensils,
- 1 Cupboard,
- 9 Tables,
- 1 Diningroom Table,
- 1 Flour Bin,
- 1 Mirror,
- 2 Bush Saws, Axes, etc.,
- 2 Hanging and other Lamps,
- Kitchen Furniture,
- Wool and Spring Mattresses,
- 1 China Set and Cigar.

JOB PRINTING in all its branches, equal in style to any, done at this office.

SOCIETIES.
